PROFILE

A self-reliable, adaptable, and committed full-stack web developer who excels in both technical and non-technical skills. Successfully enhanced competence and consistently delivered high-quality results. Passionate about learning and overcoming challenges with enthusiasm, now looking for a place to implement what I have learned.

SKILLS

Front-end Technologies : React, React Native, Next.JS, Html ,CSS, Material UI, Tailwind, Bootstrap, Handlebars, Flutter
Back-end Technologies : Node.js , Express.js , Puppeteer, PHP
DataBases : MYSQL, MongoDB, Sequelize
Languages : JavaScript, TypeScript, Dart
Additional Skills: UX/UI Design
Soft Skills : Adaptability , Time management , Self reliability , Problem solving

PROJECTS

- Ween | Full Stack Developer

Feb-Mar 2024

 - Developed "Ween," an e-booking event application using **React Native** for the frontend and **Node.js** with **Sequelize** /**SQL** for the backend.
 - Implemented **JWT** authentication system for secure user access.
 - Designed and implemented event display feature allowing users to save favorites.
 - Integrated Flousi API for seamless payment processing.
 - Enabled booking events for specific dates with notification alerts for new events.
- E-commerce Web App | Full Stack Developer

Jan-Feb 2024

 - Designed and developed an ecommerce web application using **Next.js**, **TypeScript**, Node.js, and **Sequelize/SQL**.
 - Implemented **JWT** authentication system for secure user accounts, enabling buying and selling functionalities.
 - Created an admin dashboard for tracking users, sellers, and most sold products.
- MyStory | Full Stack Developer

Dec-Jan 2024

 - Created "MyStory," a web application similar to Reddit, using **React** for the frontend, **Node.js** for the backend, and **SQL** for the database.
 - Implemented **JWT** authentication system for user accounts.
 - Developed forum-like functionality allowing users to create, comment on, and like posts.

EXPERIENCES

- Appaxis Innovation | Internship as a Full Stack Developer

JUN 2024- AUG 2024

 - Developed backend functionality to fetch and process JSON data from servers
 - Integrated Handlebars for dynamic **HTML** content generation
 - Utilized **CSS** for styling
 - Employed **Puppeteer** to convert content into PDFs
 - Integrated Konnect payment method using **React** for secure transactions and seamless user experience
